

Maresh M Yaligar

Full-Stack Developer (MERN + FastAPI) with AI/ML Integration Experience

+91-8296256433 • yaligarmahesh75@gmail.com • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Final-year CS undergraduate skilled in MERN stack and Python Full-Stack using FastAPI, with applied AI/ML experience including LLM API integration, YOLO-based computer vision, and NLP pipelines. Built and shipped cloud-backed production projects using AWS S3, JWT, and RESTful APIs. Hackathon winner (2nd place). Seeking Software Engineer or Full-Stack Developer roles in AI-integrated product development.

EDUCATION

B.E. in Computer Science (Pursuing)

2023 – 2027

Smt. Kamala & Sri Venkappa M Agadi College of Engineering, Laxmeshwar, Karnataka

TECHNICAL SKILLS

MERN Stack: React.js, Redux, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication, AWS S3, NodeMailer

Python Stack: FastAPI, Python, REST APIs

AI / ML: PyTorch, Scikit-learn, NumPy, Pandas, Matplotlib, OpenCV, YOLO, Docker

NLP: TF-IDF Vectorization, Text Classification, Sentiment Analysis, Resume Parsing

LLM / APIs: Gemini API, OpenAI API, Groq API, LLM Integration

Tools: Git, GitHub, Google Colab, Postman, Jupyter Notebook, VS Code

PROJECTS

ApiTest.Ai | MERN Stack · LLM Integration · JWT · Docker

[GitHub ↗](#)

- Built an AI-powered API testing platform with LLM-generated test suggestions; dashboard tracks project-wise success/failure rates across test runs.
- Implemented JWT-secured team collaboration with role-based access, Redux state management, and containerised using Docker for consistent dev/prod environments.

Mini Drive | MERN Stack · AWS S3 · JWT · NodeMailer

[GitHub ↗](#)

- Developed a cloud-based file management system using AWS S3 for file/photo/video storage with folder organisation, file sharing, and recycle bin features.
- Implemented JWT authentication with secure cookies and OTP-based email verification using NodeMailer.

Suspense Detection System | Python · PyTorch · OpenCV · YOLO

[GitHub ↗](#)

- Annotated a custom dataset of ~800 images and trained a YOLO model from scratch to detect weapons in real-time video at ~15 FPS; achieved 87%+ detection accuracy on test set.
- Integrated automated alert system triggered on weapon detection with under 2-second response latency.

Resume Analyzer | Python · FastAPI · NLP · TF-IDF · Scikit-learn

[GitHub ↗](#) [Live Demo ↗](#)

- Built a FastAPI-powered NLP service using TF-IDF vectorisation that predicts suitable job roles from user descriptions with confidence scores visualised as charts.
- Added a skill-gap recommendation engine; exposed results via REST endpoints consumable by any frontend.

HACKATHONS & ACHIEVEMENTS

Spam Protection System — 🏆 2nd Place

JSS College of Engineering, Mysore

- Built a real-time spam detection system using MERN stack and OpenAI API for intelligent content filtering.

Google Service Automation — 🌟 Top 5 Shortlisted

GM University College, Davanagere

- Developed a Google service automation tool using MERN stack and Agentic AI concepts to streamline workflows.

ADDITIONAL INFORMATION

Certifications: Full Stack Web Development – MERN Stack • Python (Certified) • Git (Certified)

Interests: AI/ML, Full-Stack Projects, Fitness

Languages: Kannada (Native) • English (Professional) • Hindi (Basic)
